Asheville, NC 28803

Dear Dena,

Thank you for the informative and interesting tour you provided for the CAD students on Thursday morning, Oct. 25. It is inspiring to see developers care about people's health and the environment. The recycled building materials used in the Mica Village spaces add beauty, historical context, and a lot of character. I look forward to visiting again after you have the water feature operating in the courtyard.

The class I brought on the field trip is ARC 230- Environmental Systems. I haven't covered recyclable land categories yet- brown fields, gray fields, and black fields. But your presentation was the perfect lead-in to this topic. Thank you for the warm welcome and the information. I wish you much success in the completion of the Mica Village project and future phases.

Sincerely,

A handwritten signature in black ink that reads "Sherian Howard".
